REGULATORY SPOTLIGHT — KEY THEMES, WEEK 26 / 2026

1. Mandatory Health Insurance Overhaul

The creation of the State Medical Insurance and Expertise Agency, together with consequential amendments across multiple presidential decrees, signals a structural reform of how mandatory health insurance is administered in Azerbaijan. The new agency absorbs functions that were previously distributed across several bodies. Employers, healthcare providers, and private insurers should prepare for updated compliance obligations as the agency's implementing regulations emerge. Monitor for Cabinet decisions from the new entity in Q3 2026.

3. Gas Supply Reform — Full Regulatory Reset

Cabinet Decision No. 189 replaces the gas distribution rulebook. The revocation of the 2023 framework and adoption of new comprehensive Rules signals a deliberate consolidation effort. Agreements referencing the previous regulatory regime may require review. This is consistent with the broader pattern of gas sector reform since the enactment of the Law on Gas Supply (Law No. 233-VIIQ, 8 July 2025). Legal teams advising energy clients should flag the need for a regulatory impact assessment.

2. Digital Customs & State Finance Infrastructure

Two of this week's presidential decrees — the "Intellectual Customs" system and the amendment to the "Digital State Finance" charter — represent continued investment in Azerbaijan's digital governance architecture. The AI-assisted customs system in particular has direct implications for import/export clearance timelines, risk-based inspections, and trade documentation. Logistics, customs, and international trade practitioners should note this as a significant procedural shift for cross-border transactions.

4. Export Diversification & SME Finance

Three instruments this week form a coherent policy cluster on economic diversification: Order No. 436s (credit subsidies for entrepreneurs), Order No. 424s (non-oil export stimulation and transport cost support), and Decision No. 196 (SME support effectiveness assessment). Together these implement a suite of presidential decrees from 9 June 2026 (Decrees 680 and 681). Firms advising SME clients or export-oriented businesses should flag the availability of new subsidy instruments and assess their clients' eligibility under the new frameworks once implementing rules are published.
